To Whom It May Concern;

Please allow me to introduce myself, my name is Bryan Baker also known as DR LIMO. I write a column for LCT magazine and own a limousine fleet of 13 cars. I am an ASE Master Certified mechanic and have been for 15 years. I currently service a fleet of 31 limousines in my local area. I was asked to test a product called the FUELMISER in September of 2006. I installed it on my personal truck, a 1989 Chevrolet 1500 4X4 the truck has a custom built engine and has gotten 10.5 miles per gallon since I installed it. I kept track on the averaging method, filling to the first click and dividing mileage by gallons. I installed The FUELMISER, and continued to track the mileage. I was surprised to find the mileage increasing. The truck went from 10.5 miles per gallon to 12.1 miles per gallon as tested over 30 fill ups. The device is still on my truck and I ordered 8 of the FUELMISER for my vehicle fleet. I have seen the same 10% increase on all of my limousines as checked for the past year. I submit that the device works and would recommend it to anyone.
