Re: Fuel Miser

I write you today to report my results of the Fuel Miser product on my Chevrolet S-10 Pick up truck. Prior to installing the Fuel Miser, I tracked my MPG at an average of 19.03 miles per gallon. After the installation of the Fuel Miser, the vehicle is averaging 24.268 miles per gallon. In addition to the increased fuel economy, I immediately noticed an increase in performance. The truck simply ran better and smoother. I noticed that during my routine daily route that I did not have to down shift at certain points in the trip in which I had to prior to the Fuel Miser installation.

I am really impressed with Fuel Miser and I would recommend the Fuel Miser to my customers. I also will be installing one on my wife's Jeep Cherokee.

Sincerely,
