To Whom It May Concern:

The Limousine Associations of New Jersey is most pleased to provide an endorsement for FuelMiser. At a time when our industry is desperately trying to find cost savings in order to stay in business, FuelMiser provides an environmentally cost effective way.

A major expense for any operator in overhead costs is gasoline. The cost of fuel has risen dramatically over the past two years and significantly hurt most operators' bottom line. FuelMiser provides the means for lowering the overall cost of fuel by enhancing the efficiency of consumption. Imagine getting 10%-15% more miles out of a tank of gasoline. I had fuelmiser installed on both of my Ford SUV's, and we all know the poor mpg performance that similar vehicles are known to get. My 2000 Eddie Bauer Explorer recently received 21.1mpg on a long distance trip to South Carolina.

Our 2003 Eddie Bauer Explorer is rated for 14-17mpg. However, its performance has been weak to say the least. I am now receiving over 19mpg. It is amazing. FuelMiser also cuts emissions.

If you would like to save yourself significant operating dollars, join other LANJ members and limousine operators across the country that have made the wise choice and installed the FuelMiser on their vehicles. The Ford mechanic was able to install my fuelmisers in about 20 minutes.

If you have any questions, feel free to call me.

Sincerely,

Barry E. Lefkowitz
Executive Director, LANJ
