

# Premier Recovery Service

December 3, 2008

In August 2008 we purchased 5 FuelMiser units. Prior to the installation we had consistently tracked each vehicle's mileage which provided us with an accurate baseline.

The units were installed in (2) 2007 Ford F550's, (1) 2008 Ford F550, (1) 2007 Dodge 3500 and 1 2006 UD/ Nissan 2600. The UD 2600 is a flatbed. The remaining vehicles are equipped with self-loading tow beds.

At the end of October 2008 we analyzed the data. Our mileage for the 5 vehicles had improved by 9.375%. With diesel fuel running more than \$4.00 per gallon at the time, the payback on our investment was just over 40 days.

Sincerely,

Michael L Plue  
President
