Attention: Nick Falco

On October 15th, 2008, you installed the Fuel Miser System on our 2007 International 4300 truck. We have always tracked fuel consumption on all of our company trucks. This truck averaged 7.5 to 8 M.P.G. prior to the installation. After one month of use we have seen an increase of 1.2 to 1.5 M.P.G. With fuel still well over \$3.50 per gallon this is a cost saving increase. On average this truck travels 30,000 miles per year. This increase will result in a savings of approximately 650 gallons per year. Producing a cost savings of approximately \$2,200.00 in a year's time. In today's economy with cost increasing daily \$2,200.00 is a welcome saving.

I would recommend this product to anyone who is interested in saving money on their fuel expenses. Thank you again for introducing our company to the Fuel Miser System.

I hope to be installing this on the rest of my fleet very shortly.

Sincerely,
Charles Schmidt Jr
